We are one of London's largest and busiest teaching hospitals, with a strong profile of local services primarily serving the boroughs of Lambeth, Southwark and Lewisham. Our specialist services are available to patients across a wider catchment area, providing nationally and internationally recognised work in liver disease and transplantation, neurosciences, haemato-oncology and foetal medicine.

The Liver Unit is a national service and is run as an integrated medical and surgical unit, for inpatients and outpatients. The Liver Unit is dedicated to the management of children with liver disease and provides highly specialised care. This includes nutrition, family support and organ transplantation services involving liver, liver and kidney, liver and small bowel and isolated small bowel.

The philosophy of the unit is based on family centred care. The multidisciplinary paediatric team includes paediatricians specialised in hepatology, gastroenterology and nutrition. Surgeons specialised in hepato-biliary and transplant surgery, and a specialised team including liaison nurses, ward nursing team, transplant coordinators, dieticians, physiotherapists, psychologists, social workers, pharmacists and play therapists.

The unit is supported by high quality radiology, histopathology, anaesthetic, intensive care and other paediatric specialists within the Birmingham Children's Hospital.

The Wilson's Disease Support Group UK is an all volunteer organisation which strives to promote the well-being of patients with Wilson's Disease and their families and friends.

The organisation aims to provide informative articles about the nature of the disease, articles written by patients, families and friends about their experiences of the disease, recent progress in treatment and much more, by way of a biannual newsletter.

The organisation also aims to promote networking of WD patients and their families by helping and encouraging them to correspond with each other.
